1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 38, and 41, drawn to a soy bean product and liquid or food that contains same, classified in class 426, subclass 634.
- II. Claims 12-37, 39, and 40, drawn to a method of making a soybean product and liquid or food that contains same, classified in class 426, subclass 634.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of making same. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product may be made by a process wherein the soybean substrate is treated with an enzyme, inactivating said enzyme, and then defatting said soybean material.

3. Because these inventions are distinct for the reasons given above and the search strategy required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
